SUMMARY

Motivated final-year Software Engineering student with a strong foundation in front-end and mobile development. Eager to learn new technologies, apply problem-solving skills, and contribute to impactful projects in a dynamic team environment.

EDUCATION

University of Information Technology - VNUHCM

Oct. 2021 - Aug. 2025

Bachelor of Information Technology. Major: Information System

GPA: 8.35/10

ACHIEVEMENTS

Awarded Undergraduate Scientific Research (2024, 2025)

1st Place – SEAPP 2024 Competition

[Link](#)

2nd Place – ISE Spark of Ideas Fall 2024 Competition

[Link](#)

TECHNICAL SKILLS

Programming Languages Javascript, Typescript, Python, C#

Frameworks Next.js, React Native, Flutter, ASP.NET Core

Libraries Frontend ReactJS, Ant Design, Tailwind CSS, Tanstack Query, Redux Toolkit

Others English, Research, Communication, Git, Figma, Postman, Agile, Docker

EXPERIENCE

1. StackTech - Frontend Developer

June. 2025 - Present

- Developed **Flutter Web dashboards** for a **CRM system** serving over **5,000 clients**, using **Clean Architecture**, **BLoC**, and **GoRouter**, and converting UI from **Figma** into responsive widgets.
- Integrated **RESTful APIs** with efficient asynchronous data handling and implemented **self-testing** to ensure system stability.
- Built the company's **introductory website** using **Next.js**, optimizing performance and SEO.
- Developed **React Web** features, integrating **chat SDK** and **Centrifugo** for real-time messaging.
- Implemented advanced chat capabilities including **message streaming**, **live translation**, and **auto language detection**.
- Wrote comprehensive tests using **Vitest** for integration testing and **Cypress** for end-to-end testing to ensure reliability and quality.

2. GEEK Up - Product Frontend Intern

June. 2024 - Aug. 2024

Team: Geek Internship Team - 14 members

- Created responsive and scalable UI components with **ReactJS**, **Refine**, **React Query**, **TypeScript**.
- Contributed to cross-functional teams by collaborating on **design sprints**, **product analysis**, **design**.
- Built modular components with state management and **REST API integration**.
- Proficient in **Agile methodology**, **team communication**, **task management**, contributing to a smooth and efficient project workflow.
- Built a skill development website for Gen Z with user and admin management panels.

UNIVERSITY PROJECTS

1. Taseven

March. 2024 - July. 2024

Role: *Leader, Fullstack Developer - Team size: 4*

Developed a mobile application for task management and event tracking, featuring an interactive map to display key events and locations.

About project:

- Developed RESTful API for information exchange between client and server.
- Designed database, built codebase with MVC architecture, and researched UI.
- Implemented event management CRUD and Google Login for secure user authentication.
- Implemented sharing features, deep linking, and Google Maps tracking.

Technologies: React Native, Epxress, Firebase, Cloudinary, MongoDB, Google Maps API

Source: [Link](#)

2. Neural Parking

April. 2024 - June. 2024

Role: *Fullstack Developer - Team size: 3*

Neural Parking is an application that utilizes Computer Vision to automate parking management. The system employs YOLOv8, an advanced real-time object detection algorithm, to recognize license plates, count empty parking spots, and detect fire hazards.

About project:

- Uploaded the application to Google Play Store.
- Fine-tuning 4 algorithm models for application development. (plate, ocr, parkinglot, fire/smoke).
- Frontend features: Mobile App, Landing page, Admin Dashboard.
- Backend features: Login/Register, license plate recognition, detect and count parking lot.
- Deployed a server using Docker, Nginx, and Docker Compose on an Ubuntu VPS.

Technologies: React Native, Flask, Firebase, Cloudinary, MongoDB, Docker, nginx, YOLOv8

ACTIVITIES

WebDev Studios - UIT

Feb. 2023 - Aug. 2025

Programming Team Member

- Using **Next.js** to build the official website for the **Webdev Adventure** contest.
- Participated in organizing the contest and managing event-related technical tasks.
- Trained participants in basic web programming concepts and development practices.
